Civil Action No.

COMPLAINT FEB 28 2007

U.S.D.C.S.D.N.Y.
JURY TRIAL DEMANDED
CASHIERS

Plaintiff Preston W. Grant ("Plaintiff"), by his attorneys, for his Complaint against defendant Novartis Pharmaceuticals Corporation ("Novartis" or "Defendant"), alleges:

1. This is a civil action for damages suffered by Plaintiff as a result of his being prescribed and injected with Defendant's drug Zometa.

PARTIES

2. Plaintiff is a citizen and resident of the State of New York, residing in Whitesboro, New York.

3. At all times herein mentioned, Defendant was and is a Delaware corporation, with its principal place of business at One Health Plaza, East Hanover, New Jersey 07936-1080.

4. At all times herein mentioned, Defendant did business in the State of New York.

JURISDICTION

5. This Court has original jurisdiction over this action under 28 U.S.C. § 1332, in that the amount in controversy exceeds seventy five thousand dollars (\$75,000.00) and Plaintiff is a citizen of a State which is different from the State where defendant is incorporated and has its principal place of business.

FACTUAL BACKGROUND

6. Defendant designed, tested, developed, manufactured, labeled, marketed, distributed and sold Zometa.

7. Zometa is the brand name of zolodrenic acid, which is in a class of prescription drugs called bisphosphonates. Zometa is administered intravenously and/or by injection.

8. Zometa was approved by the United States Food and Drug Administration for treatment of hypercalcemia and bone metastases.

9. The product literature prepared by Novartis and circulated to physicians for use in prescribing the drug contained no warning about osteonecrosis of the jaw or other bone structure.

10. In 2002 or before, Defendant received information from a physician that several of the physician's patients who were given Aredia, another bisphosphonate designed and manufactured by Defendant, were diagnosed with osteonecrosis of the jaw and that he believed a causal relationship existed between the use of Aredia and osteonecrosis of the jaw.

11. Another group of physicians published a report about patients being diagnosed with osteonecrosis of the jaw after being given Aredia and Zometa. The report said, "the jaw complications presented in this review have had a major negative effect on the quality of daily life for each of these patients" and determined that "bisphosphonates may be at least partially responsible." Ruggiero, et al., "Osteonecrosis of the Jaws Associated with the Use of Bisphosphonates: A Review of 63 Cases," Journal of Oral and Maxillofacial Surgery, vol. 62, p. 533 (2004).

12. Defendant sent warnings to physicians regarding the risk of osteonecrosis of the jaw with the use of Aredia and Zometa in September 2004 and May 2005.

13. Plaintiff was prescribed and given Zometa.

14. As a result of being given and/or injected with Zometa, Plaintiff developed osteonecrosis of the jaw.

15. As a result of being given and/or injected with Zometa Plaintiff suffered compensable injuries, including but not limited to the following:

- a. severe and permanent physical and medical injuries and associated disabilities;
- b. severe past and future pain and suffering;
- c. severe past and future mental anguish;
- d. loss of enjoyment of life;
- e. increased risk of health problems;
- f. past and future medical care and monitoring; and
- g. loss of past and future income.
